LIVELY LIVERS. Perfect Purification the Only Life

Prolonger. KEEP THE SEWERAGE SYSTEM OPEN IF YOU WANT TO ENJOY MANY YEARS OF

HEALTH AND HAPPINESS. THE ADVICE OF REASON.

The liver is the biggest organ in the human

body, and has lots of work to do. It passes judgment on the food we eat, separating the useful from the useless. All food must pass the liver. All food must go this one way, and if the liver is lazy and don't attend to its duties all the other organs suffer. It is just like stopping the engine in a factory.

All the rest of the machines are thrown out of work until it starts up again. Another duty of the liver is to take the bile out of the blood and send it into the bowels where it acts as a sort of lubricant and helps the undigested matter out of the body.

If the liver does not act properly, the bile goes wrong, remains in the blood, makes yellow-greenish complexion, "liver spots," and causes all kinds of aches, pains and sickness.

The liver must be kept lively and attending to its duties, and the safest, surest, simplest way is to use Cascarets Candy Cathartic, the ideal laxative, agreeable to the taste, convenient in form, antiseptic, and a fine stomach tenic. They purify the blood, never grip nor gripe, and do their work mildly but positively.

Buy and try Cascarets today. You'll find that it's what they do, not what we say they'll do, that proves their merit. All druggists, 10c., 25c. 50c., or by mail for price. Send for booklet and free sample. Address Sterling Remedy Co., Chi cago, Montreal, Can., or New York.

This is the CASCARET tablet. Every tablet of the only genuine Cascarets bears the magic letters "C C C." Look at the tablet before you buy, and bewere of frauds, imitations and substitutes.

Take Baby Riding. If you need a Go-Cart or

Carriage we can supply that need at small cost and at the same time give you the benefit of easy weekly or monthly payments, arranged to suit your convenience. Go-Carts are destined to be exceedingly popular this season, and the daintiest upholsteries. Both Carriages and Go-Carts are fitted with all the latest improvements, including rubber tires, patent wheel brakes and parasol holders. Of course, you know we areheadquarters for Furniture, Bedding, Crockery, Mattings, etc.—and your credit is always good.

SYRUP Of FIGS.

Never Imitated in Quality.

An Excellent Combination.

The pleasant method and beneficial effects of be well-known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, beadaches and fevers gently yet promptly, and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senns and other aromatic plants by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the company printed on the front of every package.

HOME FOR A 'VARSITY EIGHT WANT THE DATE CHANGED

NEW BOAT HOUSE.

Candidates for the Crew at Work on With Shells.

The Georgetown University Boat Club will probably be an organization of the near future, with headquarters in the boat house formerly owned by the Columbia Athletic Club, at the foot of 32d street. A general outline for the formation of the guration of the President of the United club has been prepared, but the details States. Dr. E. W. Kirby presented a letter have not been worked out. Nothing defi- and newspaper article on the subject renite will be announced for several weeks, ceived from Judge Knott of the Court of though it seems to be an assured fact that | Claims. The newspaper article gave what the boat house will be kept open the entire purported to be a history of the fixing of

While the oarsmen of the university will train at the place and occupy it for practice work for the intercollegiate regattas, the house will have a larger field of action. It is proposed to have the building open not only to the students of the college proper, but to the law and medical departments. The plan is also being considered of including in the membership of the club members of the Alumni Associa-

tion of the 'varsity.

According to the notices issued by Capt Elmore the members of the Columbia Athletic Club, who had boats and other property stored in the building should have removed them by Saturday. While many of the private boats were taken away, there still remains a number of others—canoes, outriggers and pleasure boats-whose own-ers have not responded to the call, some being out of the city. It is hoped to get these out of the way soon so as to leave reom for boats belonging to the university. The storage space is quite large, but the room is pretty well filled up.

Candidates on the River.

Georgetown University took possession of the candidates for positions in the eight ing the change be offered in state legislahave been training, and on clear days have tures.
"Inasmuch as a great deal of patriotic had work on the river. The candidates for the crew are under

the care of Mr. Claude Zappone, who is coaching the men and getting them in year, and his work is appreciated. On account of the fact of the base ball games to be played this week the training of most of the candidates is being done in the forencon. The manager of the candi-dates is William Kurtz Johnson, whose brother is a member of the firm of Gurley & Johnson, and through whom the deal for the purchase of the place was arranged. The captain of the eight is Frank J. Kerns of Worcester, Mass., formerly champion amateur single sculler of New England, who was also captain of last year's eight, which made a creditable showing at Poughkeepsie despite the shortness of time in which the crew rowed together and the limited practice.

The Boats,

The oarsmen are well supplied with shells for the eight, there being four which are available. Two others are on the top shelf, but are old, and are hardly fit for the strain of a race. Of the eights belonging to the university two were bought last season, one for practice and the other for rac-ing. Two were acquired when the boat house and contents were purchased, one of which is a racing shell, while another will be used for practice work. Two of the eights are of cedar and the other two are

of paper.

Among the boats which went with the purchase, besides the two eight-oared shells already mentioned, were three four-oared shells and two working boats—one four-oared and one pair-oared, both of which will most likely be used a good deal this season.

Three outriggers were also included, and

one "centipede." The large pleasure barge is also included, with its ten oars, capable of accommodating thirty-two persons, and as long as the regulation eight-pared shell. besides an abandoned four-oured shell which is of no more use. In all, about fif-teen boats were included in the transfer, which, of course, includes the oars and he tools and fixtures of the boat house. While the purchase of the house by the university was announced in The Star some weeks ago, the deed transferring the property has not as yet been placed on record. The purchase price is said to have been \$2,000. Mr. James P. B. Duffy will

look after the university's interests at the boat house.

The Boat House.

The boat house is a two-story frame building directly on the water front, and presents a fine appearance. It is of generous dimensions, and perhaps has more floor room than any of the other boat houses on the river. On the second floor is a spaclous balcony, with an attic balcony, the windows of which break the monotony of the steep, slanting roof.
On the the first floor the entire space is devoted to the storage of boats, there being three alsies, extending the entire length of the house, on either side of which boats are placed on racks, while the space against the side walls are devoted to the storage of the smaller boats, the racing shells occupying the main portion of the floor. Three stairways lead to the second floor. The northern part of this floor is devoted entirely to locker rooms, of which there are nearly 200, a second tier of lockers being in a small gallery. The shower baths are located on this floor. The southern part of the second floor is used as the ball and reception room. From the ball room to the balcony, affording a splendid view of the river, four or five large windows, extending to the floor, lead, giving plenty of light and affording easy neans of communication.

James F. Fearson has been appointed

custodian of the place. He held the same position when the Columbia Athletic Club occupied the house, and because of his good work and knowledge of boats he was

A good many repairs will be made upon the house. The float has been strength-ened, and new planks will replace the worn-out ones. The water-front of the house will be painted blue and gray, while the roof will be given a red tint. The rest of the building will be painted later.

TRIBUTES PAID.

Societies of Which Dr. Busey Was a Member Extol His Memory. A meeting in memory of Dr. Samuel C.

Busey was held last evening in the assembly hall of the Columbian University. It was a joint service on the part of the various societies with which Dr. Busey had been identified during his active career in this city as a practicing physician and public-spirited citizen. Prof. Charles D. Walcott, the president of the Washington Academy of Sciences, presided, and in the course of some introductory remarks spoke of the value of Dr. Busey's services as a of the value of Dr. Busey's services as a member of the beard of directors of the academy and of his activity along other lines. He then introduced Dr. George M. Kober, who spoke on behalf of the Medical Society.

Dr. Kober gave an appreciative as well and the statement of the service of Dr. Busey's services as a services as well as the statement of the services as well as the services as the services as the services as well as the services as the servic

Dr. Kober gave an appreciative as well as a discriminating sketch of Dr. Busey's career, especially as a physician, and emphasized those qualities which made him a force in this community as well as a distinguished ornament to his profession.

As representing the Columbian Historical Society, Mr. W. B. Bryan spoke of the literary activities of Dr. Busey, laying stress upon the fact that the entire product of a busy pen, with the exception of contributions to medical literature, was the result of labors undertaken after Dr. Busey had passed the age of sixty-seven.

The Philosophical Society was represented by Dr. Robert Fletcher, who paid a graceful tribute to the sterling worth of Dr. Busey and the value of his services on various lines. On the part of the Anthropological Society Prof. W. J. McGee spoke fitting words of the broadness of the intellectual sympathy of Dr. Busey, and Mr. Marcus Baker, representing the Washington Academy of Sciences, made the closing address and commemorated Dr. Busey's interest and efforts in the work of the academy.

Mr. Wm. F. Meyers of the executive office of the District government has recommended to the Commissioners that 225 copies of the laws affecting the District passed at the last session of Congress, including the code, be printed and sold to the public. The Commisioners have approach the recommendation

GEORGETOWN DARSMEN IN THEIR NORTHEAST CITIZENS DISCUSS IN AUGURAL DAY PROPOSITION.

> Communication on the Subject From of Claims.

At the regular meeting of the Northeast Washington Citizens' Association, held last night, several matters of interest to the association were discussed, among others the question of changing the date of the inauthe date.

In his letter Judge Knott gave the information that the Senate had twice voted for a change from the 4th of March to the 30th of April, and on one occasion the House passed the measure, but not by the necessary two-thirds majority. The failure of the measure, the judge said, was due to the action of one member of the House of Representatives, who had a scheme of his own in the nature of an amendment to attach to the bill.

"You cannot do a greater service to the city of Washington and to the people of the United States than by getting this most desirable change made," wrote Judge Knott. "Everybody was in favor of it in the '80's except the House of Representatives. The local newspapers and all the leading newspapers of the country advocated it and nobody opposed it. I procured without trouble petitions from militia organizations and encountered no opposition from any source except that of the member who had a scheme of his own."

Judge Knott suggests in the light of his past experience that the amendment be introduced first in the House of Representatives and that petitions from the people of the building March 21, since which time the also suggests that resolutions advocat-

feeling was aroused in favor of making a change to the day when Washington was first inaugurated, the 30th of April," wrote, "and inasmuch as a great deal of that feeling still continues in the country, it seems plain that you had better substi tute the 30th of April for the 4th of May and unite thereby all persons who will advocate the change. In conclusion I wish you success. Your association may make a national reputation by making this matter its special business. I hope it will do the one and attain the other."

Dr. Kirby also read extracts from the newspaper article, and proposed that ef-forts be directed to having April 30 substituted for May 4, the date mentioned in the resolution previously passed by the asso

Mr. Nash suggested that President Tucker, Secretary Sowerbutts and Dr. Kirby compose a committee to take the matter under consideration and communicate with committees of other associations.

Railway Affairs.

Under the call of committees, Chairman Frizzell of the railroad committee said he had to report that the railroad company (B. and O.) had not yet commenced the work of building a new station. He said he had conversed with officials about the railroad question and was told that the alleged alliance between the two roads would make no change in the present plans. Both de-pots, he was told, would undoubtedly be built, and there will be no union depot. said he had received no information relative to the location of No. 3 Engine Com-pany, the house of which is to be torn

President Tucker said he thought some attention should be paid to this matter, as the engine should not be located down the Chairman Foster of the school committee

said he thought the new school building for the relief of Trinidad and other sections should be erected north of Florida avenue. The association so voted. Dr. Walter suggested that it would be well to have the District purchase ground for a playground for boys adjoining the Pierce School at 14th and G streets. There

is already a playground for girls, but none for boys. A resolution embodying the doctor's views was passed and referred to the Dr. Kirby, chairman of the sanitary committee, submitted a resolution setting forth the condition of the Anacostia flats. He also urged that an item of \$200,000 be put in the District appropriation bill for next year. The resolution was adopted.

Dr. Walter submitted a resolution com-mending Lieut. John C Daley of the ninth police precinct and protesting against his removal from the northeast section. The resolution was adopted. Secretary Sowerbuits read a communication from the inaugural committee relative to the action of the association in the matter of endeavoring to bring about a change of the date of the inauguration of

the President. The letter was an acknowledgment of a communication sent to the committee by the association.

A communication from the National Municipal League was received in which the association was invited to send one or more delegates to the annual meeting of the league, to be held at Rochester, N. Y., next month. The invitation was accepted, and President Tucker was selected as delegate to the meeting. Other routine business was transacted and the association ad-

journed until September. RESULT OF AN AFFRAY.

Dennis Watkins Locked Up at Fourth

Precinct Station House. Dennis, also known as Edward, Watkins was arrested last night by Policeman Lake and locked up at the fourth precinct for the Virginia authorities. Burton Thomas, also colored, his alleged victim, was taken to the Emergency Hospital to be treated for a severe stab wound of the abdomen and a cut across his wrist. The wounds were received during a row at Jackson City about 5 o'clock in the afternoon. Friends of Thomas brought him across the river and carried him to the hospital.

of the affair and arrested Watkins. The injury received by Thomas is of a serious nature, but at the hospital today it was stated there was no immediate danger of death. The Virginia authorities were notified of the affair, and were requested to take charge of the prisoner.

The Review of Nations. The Review of Nations, to be given tomorrow evening at Masonic Temple, promises to be one of the most unique as well

as brilliant and instructive pageants ever seen in Washington. The members of the Legion of Loyal Women, estimating the expansion of this government at its true value, have secured for this occasion probably the tallest man in the United States. Mr. Voight Burke of Englishtown, N. J., has consented to appear in the character of Uncle Sam. His actual height is seven feet and seven inches. Being only twenty-three years of age, there is time for future growth with him, as also with the nation, which is in
